Binding for Home,
Education and Business

www.gbceurope.com

How to Choose - Binding

1 What do you want to bind and how often?

PROFESSIONAL
(External Documents)

P

Use for pitches, tenders and client presentations

Important individual documents

BUSINESS
(Internal & External)

B

Use your document to impress during client meetings

Internal use to say something about you and self promote

INFORMAL
(Internal Documents)

I

Training materials / storage & reference documents

General every day use

2 Choose the right binding style for your purpose

What do you plan to do with your document												
	CombBind		ClickBind		WireBind		ThermaBind		CoilBind		StripBind	
Document lays flat (for photocopying)	✓	✓	✓	✓	✓	✓			✓	✓		
360 degree page turning (for easy reference)			✓	✓	✓	✓			✓	✓		
Editable (easily add or remove pages)	✓	✓	✓	✓					✓	✓		
Secure bind (cannot remove or change pages)					✓	✓	✓	✓			✓	✓
Suitable for mailing	✓	✓	✓	✓			✓	✓	✓	✓	✓	✓
Highly professional finish			✓	✓	✓	✓			✓	✓	✓	✓
Modern and flexible design			✓	✓	✓	✓					✓	✓
See page number	xxx-xxx		xxx-xxx		xxx-xxx		xxx-xxx		xxx-xxx		xxx-xxx	

3 Choose the front and back cover to suit your style and add those finishing touches

Polypropylene covers are frosted clear – made from 100% post-consumer recycled material

Cardboard covers offer a variety of textures and are perfect for your back cover

PVC has a clear, glossy finish to show off your title page

Finishing touches

For the perfect finishing touch, choose tab dividers to easily separate and identify sections

File strips allow you to easily archive your bound document

ClickBind™

The most upscale and easy-to-use spine gets you maximum attention with minimal effort. 34 hole spines zip and unzip with a ClickBind editing tool or by hand so you can add and remove pages anywhere, anytime. Compatible with any ClickBind or WireBind hole pattern.

ProClick Pronto® P3000

The ProClick Pronto P3000 system offers integrated punching capability and automatic binding of the ProClick spine. Easy to use and highly versatile, the P3000 provides professional, high speed binding suitable for a multitude of shared office environments.

- Simple to operate, no training required
- Intuitive LCD interface provides easy to follow instructions as you bind
- Document size indicates the correct spine size every time
- Alignment guide ensures precise punch hole location
- Automated for high volume production
- Six second binds up to 450 books per hour
- Pre-loaded ProClick cartridges that hold 20 spines each eliminate the need for loading individual binding spines

Binding Ideas and Tips

It's not just what you say; it is also how you say it, present it and package it.

In today's increasingly competitive and communicative world, getting your message across has become much more of a challenge. GBC understands this.

Please read our ideas and tips to help you determine what to bind and how to present it.

What to bind

In the office:

- Research results
- Presentations
- Sales tools
- Project information
- Status reports
- Training manuals
- Proposals and tenders
- Contracts and legal documents
- Reference documents
- Business policies

At home:

- Calendars
- Recipe books
- Photo albums
- Diaries
- Writing assignments
- Phone book
- Scrapbooks

In education:

- Teaching guides
- Writing assignments / dissertations
- Emergency / incident book
- Fire regulations / role call lists
- Phone books

Binding tips

- When you place your document in the punching throat of the machine make sure it is fully in by moving it from side to side, then ensure your document is aligned to the left.
- When using a cover and back, place a sheet of paper in between before punching.
- When using a ClickBind spine, pinch the first two rings together before using the zip tool.
- Make sure all of the pages are aligned before you place the document onto the spine.
- Prior to inserting the binding spine, place the back cover on the front then once bound rotate the back cover to the reverse so that the spine is completely hidden.

Design tips

- Create a background for PowerPoint slides and title page based on your company colours and style. If you would like to use the same template again, create a folder on your computer named template and save it there.
- When grouping text and images, the images should be separate and distinct so the audience knows where to focus.
- Use pictures as bullet points. Go to bullets, then select picture, and import.
- Use up-to-date images with a professional look instead of clip art. Many images are available at no charge on the web.
- Using too many arrows on your slides results in clutter and confusion. Try boxing the information together.

Delivery tips

- Have an opening statement that will encourage audience involvement. Asking questions is one way to do this.
- Let the audience know what's in it for them.
- Use visual aids in moderation; too many overwhelms your message.
- If something goes wrong during your presentation, do not panic. Relax, take a breath and pick up where you left off.
- Watch for filler words such as "um," "like," "you know".

Packaging tips

- Package your presentation to match the occasion.
- 76% of professionals believe a bound presentation gives materials a more professional appearance.
- If in doubt, make your presentation more professional than casual. It's always an advantage if you look polished.
- Packaging with durable materials will add shelf life to your presentation.
- Laminate visual aids to enhance their appearance and give you the ability to display them in the meeting room. And they can be re-used for future presentations.

Content tips

- Understand and know what you are talking about.
- Develop your own story on the topic to connect with your audience.
- Your word choice is often more important than the words themselves.
- Make sure your presentation is clear, focused and interesting.
- What you are saying now is not as critical as what you will say next. Keep your audience eager to hear more.

Want effortless binding with perfect results?

GBC's new range of comb binding machines feature low punch force technology, to **reduce punching effort by up to 50%** for increased productivity.

GBC Binding: SIMPLE, INSTINCTIVE, PRODUCTIVE
